

Private Capital Flows to Africa: Perception and Reality

Forum on Debt and Development (FONDAD)

Fondad is an independent policy research centre and forum for international discussion established in the Netherlands. Supported by a worldwide network of experts, it provides policy-oriented research on a range of North-South problems, with particular emphasis on international financial issues. Through research, seminars and publications, Fondad aims to provide factual background information and practical strategies for policy-makers and other interested groups in industrial, developing and transition countries.
